1.0 Overview

Magic Mirror is an interactive mirror with integrated hardware and software that benefits you in multiple ways with the different customizable modules incorporated. It is a one box solution that can serve as a data collection method, promotional and brand building tool and also an attention catcher tool. The mirror is incorporated with the body sensor and it fully utilizes the body movement sensing feature through the different modules. It also features studio quality camera and studio flash for high quality photo capturing in a high resolution display. Using the touch screen function, you are able to have an interactive communication with the mirror. 200-240V power point socket or an Ethernet socket is required for Magic Mirror to function.

1.1 Hardware

Magic Mirror is a one box solution where all of the components are packed together in the mirror. It is space efficient as it only requires minimal storage place. For detail information on the dimensions for Magic Mirror, please refer to *section 1.1.2*.

1.1.1 Equipment

The equipments used are as follows:

PC

Packaged with 3rd generation Intel® Core i3-3220 processor to ensure a smooth running of all functions of Magic Mirror. It also comes with dedicated Graphic Card that allows clear display of different modules of Magic Mirror.

- System Memory : Up to 8GB 1333MHz Dual channel DOR3 SDRAM
- **Discret :** Nvidia GeForce GT620, 1GB, DDR3 (ML117, DVI + HDMI)
- Primary Storage : 500GB 2.0TB 7200 RPM SATA Hard Drive,

All Hard Drives have 3.0Gb/s interface & utilize NCQ

• **Power Consumption :** 60-200W

Touch Screen

Features a high speed of response of 13m sec through 4mm thick glass that ensure a responsive experience. The 19.1 inch touch screen allows you to interactively communicate with Magic Mirror such as entering email to receive the captured photos.

- **Touch Area :** 364mm × 290mm
 - **Power Consumption :** 20W (approx.)

Response Visual Unit

Equipped to make response through gesture control on a high screen resolution display of 1920 x 1080. It is equipped for the full functionality of Magic Mirror's different modules such as responding with the body movements shown on screen to allow the virtual dressing accurately superimpose on your body.

- **Brightness :** 450cd/m2
- **Diagonal Size :** 40" widescreen
- **Contrast Ratio :** 3000:1
- **Pixel Pitch :** $0.461 (H) \times 0.461 (V)$
- **Power consumption :** 163–212W

Body Sensor

Equipped to identify full body movements of user to ensure the full functionality of Magic Mirror especially in providing an interactive experience for user.

- **Connectivity :** V2.0
- **Sensor :** 3 0 depth sensors, RGB camera
- Output : USB cable

Professional DSLR Camera

Features ability to capture studio quality photos up to 12.2 megapixels. This allows the captured photos to have high clarity and good quality.

- **Image Processor :** DIGIC 4
- Lens: 18-55mm, Telephoto Zoom
- **Focal Length :** Equivalent to 1.6× the focal length of the lens
- **Focusing :** 9AF points (f/5.6 cross type at centre), Predictive AF up to 10m
- **Eyepoint :** 21mm (from eyepiece lens center)

Studio Flash

With ability to provide proper lightning for good photos taking under different conditions. It is equipped especially for condition where there is insufficient lightning. It ensures photo quality to be good and consistent under different lightning conditions.

- Flash Duration : 1/1800 sec
- **Recycling Time :** 1 sec
- Flash Output : 200W
- Fan Cooled : Yes

Kiosk Receipt Printer

Equipped for ability to print out vouchers or product slips through a direct thermal paper printing using thermal sensitive media. It is to support Magic Mirror's function of giving out vouchers when user achieved certain status such as being a high-scorer of Magic Mirror's games or allowing users to print out the product info of their wish list into a product slip and bring home. This product slip serves as a 'reminder' for users about their wish list and encourage return visit.

- **Resolution :** 8 dots/mm (203 dpi)
- **Present Speed :** 300 mm/s (11.81 inches/sec)
- **Maximum Print Width :** 80 mm = 640 pixels
- **Output Rating :** 24.0 Volts. 2.92 Amps
- Max Output Power : 70 Watts typical

Cabinet

A vandal-resistant metal cabinet with minimalist design that can be wall mounted or freestanding. The mirror cabinet comes in two standard colors:

- High gloss black finishing: high end fashion retail stores to match with

- in store design
- High gloss white finishing: to match with white walls, fit in as many customers

The cabinet is customizable with any colors. Beside, you can "re-decorate" the Magic Mirror to suit for your theme environment by sticking the laminate Vinyl printing on top of it. There are two options of installing the mirror cabinet; freestanding (a mobile unit with caster wheels) and flush mount into the wall. There are lockable doors at the back of the cabinet for the equipment access.

Mirror

A 6mm Tempered Glass or also known as a Toughened Safety Glass. It has been processed by controlled thermal or chemical treatments to increase its strength compared with normal glass to ensure additional safety Magic Mirror.

1.1.2 Dimension and Space Requirement

The dimensions for Magic Mirror are shown as follows:

The space requirement for Magic Mirror is **1650 mm (W)** X **2100(H)** X **1800(D)**. The ideal distance for the kinect gesture control is **1550mm** from the mirror.

1.1.3 Weight

The weight of Magic Mirror is approximately 150kg.

2.0 Control Panel

2.1 Control Panel Overview

The control panel is the administration portion of Magic Mirror which allows users to manage and update the content inside Magic Mirror and update the latest version to multiple mirrors which are located at different places anytime, from any networked location. Customer data, photos taken or usage statistics are also accessible and downloadable from the control panel. Besides, health check system in Magic Mirror enables you to view the health status of every Magic Mirror units, so that you are able to troubleshoot immediately when problems occur.

2.2 Log In to Control Panel

Log in to Magic Mirror control panel to manage all your Magic Mirror units.

1. Key in <u>http://controlpanel.magicmirror.me/Account/Login?ReturnUrl=%2f</u> in your web browser.

2. Enter your Username and Password to log in.

2.3 Health Check

Magic Mirror health check system is performed everyday automatically, checking the health status of each Magic Mirror unit from different locations.

2.3.1 Health Check Status

1. Select *Report* which is under *Health Check*.

Note:

There are several reasons for a Magic Mirror to be defined as Failed under the health check result.

1. Magic Mirror is disconnected from the Internet.

2. Equipments inside the Magic Mirror not working properly. E.g. camera, printer, flash gun, PC, kinect sensor, etc.

2.4 Usage Log

Each usage of Magic Mirror will be recorded and saved in a usage log. It is a downloadable log file describing the usages statistics of a particular module in a Magic Mirror unit.

2.4.1 Usage Log Statistic Info

In the Usage Log, you are able to harvest user data information like name of users, email address, phone number, Facebook ID, Twitter ID, number of users take photo, number of users sent email, number of users win voucher, etc.

2.4.2 Download Usage Log

- 1. Select *Usage* which is under *Usage Log*.
- 2. Select a *Magic Mirror unit* from the drop down menu.
- 3. Click on *Download* next to the usage log file to download it.

2. Replace *Instruction.avi* with your own video

Note:

- 1. Please make sure the filename of the video is Instruction.avi.
- 2. Video need to be in AVI format, based on the 9:16 (width : height) proportion.

3.2.5 How to Customize Promotional or Marketing Video during Idle Mode?

Magic Mirror continuously plays introduction video clip during idle mode. You can insert your own promotional or marketing videos for your products.

To customize promotional or marketing video, please follow the following steps:

- 1. Go to C:\\CompanyName_PhotoBooth\FilterMedia\EffectBackground88
- 2. Replace *IntroVideo1.avi* with your own introduction video.

Note:

1. You can insert **multiple** introduction videos, with filename of **IntroVideo1**, **IntroVideo2**, **IntroVideo3** according to the number of videos you have.

2. Video need to be in AVI format, based on the 9:16 (width : height) proportion.

2. Add in the garment images into the images folder

Note:

- 1. Garments images should be in **PNG format** with **invisible background**, and with dimension of **1200 width x 2700 length**.
- 2. Placement of clothes within image must be according to a provided mannequin image (please download from <u>http://www.magicmirror.me/MM assets download.html</u>), the image should be facing front without any angle distortion. Please zoom in the shoulder part of the mannequin image and adjust the clothes images to exactly align with the shoulder of the mannequin. This is to optimize the accuracy when users virtually try-on the dresses on Magic Mirror.

3.3.2 How to Update Products Information?

Product information will be displayed on Magic Mirror when users browse the collection and also on the printed product slip. Product information are required for shoppers to browse products (showing details such as product name, price, and sizes, etc.)

Product info on MagicMirror Screen

To update products information, please follow the following steps:

- 1. Go to C:\\CompanyName_VirtualDressing\CSV
- 2. Open **Product.csv** with Microsoft Excel or any other available program

Documents	Name	Date modified	Type	Size
Music	Frames	9/28/2015 2:12 PM	Microsoft Excel C	1 KB
Videor	Products	10/5/2015 10:48 AM	Microsoft Excel C	5 KB
Computer				
And the second se				
Local Disk (C:)				
Local Disk (C:)				

- 3. Please fill in the details accordingly in the provided product info sheet for all the products which you are going to include in the Magic Mirror.
 - 1. **ID**
 - 2. **Item Name :** The name of products

3. **File Path** : The name of the product image file (e.g. DenimShorts.png). 'File Path' column to link the product info with the matching product image.

4. **Description :** Please make sure that the name of description is same with the item name.

- 5. **Price** : in number format. If you do not want to show the price, please put '0'.
- 6. Website : put in the product URL of ecommerce site.

40	"displayY": 0,
41	"displayW": 1400,
42	"displayH": 2100
43	1
44	1

3.4.4 How to Add in Special Effect?

During festivals or special events, you can insert special effect to be displayed on the background when users playing games. For example, you can insert the snow effect during Christmas.

Snow Effect for Game

To insert special effect, please follow the following steps:

- 1. Go to C:\\CompanyName_Game\MMGame\game
- 2. Replace *sceneEffect.png* with your own special effect image.

Note:

- 1. Please make sure the filename of the image is sceneEffect.png
- 2. The special effect image needs to be in **PNG format**, with invisible background

3.4.5 How to Customize Game Rules?

A. How to Customize Acquired Score for Game Objects?

You can set different scores for different objects which the users catch into the basket.

To customize the acquired score, please follow the following steps:

- 1. Go to C:*CompanyName_Game\MMGame*
- 2. Right click on *game.xml*, edit with *Notepad* ++ or other available program.

3. Edit the *"price"* for each item.

```
Ceroducts>

Ceroduct name="item1" price="5" src="item1.png"/>
Second name="item2" price="8" src="item2.png"/>
Second name="item3" price="10" src="item3.png"/>
Second name="item4" price="8" src="item4.png"/>
```

4. You may also edit the price for special game object (e.g. your brand logo)

```
</Products>
</Product name="item1" price="5" src="item1.png"/>
<Product name="item2" price="6" src="item2.png"/>
<Product name="item3" price="10" src="item3.png"/>
<Product name="item4" price="8" src="item4.png"/>
<!--<Product name="Logo" price="10" src="Logo.png" isSpecial="true" width="200"/>-->
<//Config>
```

Note:

11

You can make the acquired score for each item multiple by three by adding 'isSpecial="true" after each item's code.

<product< th=""><th>3></th><th>DEL CARTER</th><th>anoslitani mod</th><th>12</th><th></th></product<>	3>	DEL CARTER	anoslitani mod	12	
<product< td=""><td>name="item2"</td><td>price="8"</td><td>arc="item2.png"</td><td>15</td><td></td></product<>	name="item2"	price="8"	arc="item2.png"	15	
<product< td=""><td>name="item3"</td><td>price="10"</td><td>src="item3.png</td><td>"/></td><td></td></product<>	name="item3"	price="10"	src="item3.png	"/>	
<product< td=""><td>: name="item4"</td><td>price="8"</td><td>src="item4.png"</td><td>1></td><td>2.</td></product<>	: name="item4"	price="8"	src="item4.png"	1>	2.
<Pr</td <td>duct name="Lo</td> <td>go" price="</td> <td>'10" src="Logo.p</td> <td>ng" isSpecial="t</td> <td>rue" width="200"/></td>	duct name="Lo	go" price="	'10" src="Logo.p	ng" isSpecial="t	rue" width="200"/>
<td>ts></td> <td></td> <td></td> <td>10 M</td> <td></td>	ts>			10 M	

B. How to Customize Game Duration?

The default setting for game duration is 30 seconds. You can customize the game duration according to your preferred length.

To customize the game duration, please follow the following steps:

- 1. Go to C:\\CompanyName_Game\MMGame
- 2. Right click on *game.xml*, edit with *Notepad* ++ or other available program.
- 3. Replace the "30" under the <Application> with your preferred game duration.

Note:

1. The duration is in terms of seconds.

3.4.6 How to Customize Font Colour for Game?

Game in MagicMirror

1. Go to C:\\CompanyName_Game\MMGame\game

2. Right click on *game.xml*, edit with *Notepad*++ or other available program, and replace the text under *<UI>*

- B. In Magic Mirror Server
- 1. Go to http://controlpanel.retailcam.co.uk/Account/Login
- 2. Enter username and password

Note:

Your username and password will be given by Magic Mirror Team, please contact us if you do not have it.

4.0 Installation

4.1 Hardware Installation Options

The installation for Magic Mirror is very easy and straightforward. It is ready to plug and play as the mirror will be pre-configured before shipping out to the stores. Magic Mirror installation only requires an Ethernet socket (to connect the mirror to the Internet) and a power cable socket (for the power supply). It is run on 200 - 240V power voltage. A power converter can be used if the power voltage of your country is not compatible.

There are 2 options for Magic Mirror installation, which are i. mobile unit with caster wheels ii. flush mount unit

4.1.1 Mobile unit with caster wheel

This option allows you to reposition Magic Mirror easily with the caster wheel. It features high flexibility and mobility. The back door access that is lockable enables you to access to the inner components of Magic Mirror whenever required.

4.1.2 Flush mount unit

Flush mount unit allows you to better fit the Magic Mirror with your store's interior by flush mounting the mirror into a wall or a cubicle that make it look like a normal mirror in your store. An optional plinth base can be included in the flush mount unit as opposed to the usual base with the caster wheel. Magic Mirror can be flush mounted to wall using metal L brackets. There is also a back door in flush mount unit for your store staff to access the equipments inside the mirror cabinet and it is lockable.

There are 3 options to flush mount Magic Mirror, which are:

Option 1: Flush mount Magic Mirror on a separate room or a cubicle. In this option, the back door will be removed due to limited space so the inner parts of Magic Mirror will be accessed from the sides **Option 2:** Flush mount Magic Mirror to one of the fitting room. This way of installation requires minimal floor space. It reserves the back door for access to the equipments of Magic Mirror whenever needed. Only rare occasional access required, so the back doors can be locked and the

Option 3: This way of installation is similar to option 2. The difference is that instead of using the default metal back door of Magic Mirror, you can customize the back door material to fit with the furnishing of your fitting room.

4.2 Installation Guide for Flush Mount Option

The step by step installation guide for Magic Mirror upon arrival at your store is shown as follows:

1. Handle the box carefully and unbox it nearby location that you wish to install Magic Mirror.

2. Carry Magic Mirror out of the box.

3. Put Magic Mirror to stand on side.

4. Put Magic Mirror to stand upright and lift it to the wall and secure it on the wall securely.

5. Lastly, plug in the power cable and network cable or on your Wi-Fi for Magic Mirror to function.

Note:

- 1. It is advisable to place Magic Mirror at location that is not nearby heater and at location that has 200-240V power point socket and network cable socket at the bottom back of Magic Mirror for the ease of Magic Mirror's power cable and network cable plug in.
- 2. It is advisable to place at location that enables you to access it from the back, not just for ventilation purpose, but also for situations such as replacing faulty components and rebooting Magic Mirror when needed.
- 3. It is advisable to secure Magic Mirror with metal L brackets or other methods when you chose to install Magic Mirror using flush mount option.

5.0 Operation

Magic Mirror will be preset to turn on and shut down automatically at the scheduled time. Once the mirror is turned on, the default Magic Mirror application will also start automatically. The time is normally scheduled based on the opening time and the closing time of your store or event. However, you can also start or close the Magic Mirror application at any point of time.

5.1 Start Magic Mirror application

How to start Magic Mirror applications:

5.2 Switch between different modules

During idle mode, idle mode video will continuously playing, you can switch to another module by following the steps below:

5.3 Close Magic Mirror application

How to close Magic Mirror application:

STEP 1: Tap the *STAR* on the top left corner of touchscreen.

STEP 2: Type in *password* and tap *Submit* (Password of exit module is *mm*)

STEP 3: At *Magic Mirror Launcher* page, tap the *hidden exit button* on the top left area to go back to window desktop.

5.4 Adjust Camera Settings

STEP 1: Tap [Setup] on Magic Mirror Launcher. STEP 2: Tap [Step 1: Camera] STEP 3: Adjust the settings, test and save.

	← Setup	Live View Setting
Start Magic Mirror	Stop 1: Compro	
Setup	Step 2: Calibrate	Bulb Capture Setting
Support	Step 3: Diagnose	
Restart Computer Computer	Is Running on Local Mode Switch	Test Save

5.5 Magic Mirror Cleaning Guides

Clean the Cabinet

Wipe the dust with a clean cloth.

Clean the Mirror

 Spray a few squirts of glass cleaning solution onto the mirror
 Wipe the mirror with a clean cloth or paper towel.

Clean the Equipment Inside Cabinet

Use a feather duster to remove the dust around the equipment inside the cabinet.

* This cleaning can be done less frequent, approximately once in a 6 months' times.

6.0 Troubleshooting and Support Guides

6.1 QR Code Support

Magic Mirror Need Help? SCAN here.

www.magicmirror.me/support Email: support@magicmirror.me Tel: +44 (0) 1344 988 681

What should I do if the mirror faces technical problems or other relevant issues?

There is a support QR code sticker has stacked at the side door of Magic Mirror. Client can scan on the QR code via mobile phone and they will be directed to our support web page with a list of commonly faced problems together with the solutions. There is also a support contact number and email provided on the sticker where client can contact us for support.

6.2 Hardware Failure

System Health Check

Magic Mirror is incorporated with a system health check module which will run automatically on a regular basis to check on the equipment. If there is any problem detected, there will be an *error notification* at the bottom part of the Touch Screen.

6.2.1 Camera

What should I do if camera is not functioning?

- 1. Check and make sure the power of camera is turned on.
- 2. Unplug the power cable and plug in again.

3. If the power is on but the battery power is depleted, then it might because of the power cable is not functioning.

4. Reboot the Magic Mirror by power off the main switch of Magic Mirror, wait for 2-3 mins, and power on again.

6.2.2 Printer

What should I do if printer is not working?

1. Check and make sure the power of printer is turned on.

- 2. Unplug the power cable and plug in again.
- **3.** Reboot the Magic Mirror by power off the main switch of Magic Mirror, wait for 2-3 mins, and power on again.

If the printer is still not working after rebooting, it might be due to the following reasons:

A. Paper Out: Refill with a new paper roll or place the paper roll properly.

- 1. Turn the new media roll
- 2. Tear off a full turn of the media from the roll.

3. Loading process works best with the cut as a square, straight edge.

Cut the paper in a suitable angle.

Note:

If the media is not cut square and the operator does not have the ability to cut or tear a straight edge, then the printer can fail to load the media or even cause a media jam. The media should not make contact with the platen roller before the sensor detects the media.

4. Loading media:

Automated Media Loading

The media is detected when it is inserted into empty media input slot at the rear of the printer. The printer will then start turning the platen (drive) roller when the leading edge of the media passes over the media sensor.

Then the printer will feed, cut, and eject a blank receipt and go to a ready state (solid green status indicator).

Note: Please use this loading method to load media for normal operations.

- C. Printer Bin Full: Remove the printed receipt/voucher from the printer presenter.
- C. Paper Jams: Clearing the printhead and presenter.
- 1. Clearing the Printhead:

Note:

- 1. **Printhead becomes** hot while printing. To protect from damaging the printhead and risk of personal injury, avoid touching the printhead.
- 2. *Always* disable printer power by unplugging the printer from the kiosk power supply or turning off the printer and/or kiosk power.
- a. Carefully cut the media at the rear of the printer.
- b. Open the printhead.
- c. Remove and discard the damaged media.
- d. Close the printhead and reload the media using the Automated Media Loading method.
- 2. Clearing the Presenter:
- a. Open the presenter.
- b. Remove and discard the damaged media.

- c. Close the presenter securely.
- D. Printer Disconnect: Reconnect to host computer.

6.2.3 Kinect

Kinect is considered not working when *People standing in front of the mirror cannot be detected:* You can walk out from the sensor area and walk in again to see if the kinect detects you. The ideal distance for the kinect detection is *1.5 meter* from the mirror.

To Check whether Kinect is Working

Go to C:\\MMSupport\KinectBrowser\KinectExplorer to view the item that Kinect looking at.

Note:

Close all windows of Magic Mirror module before check this.

This mean the Kinect detected a chair as a person. Please remove the chair.

What should I do if Kinect is not working?

- 1. Check and make sure the power of Kinect is on.
- 2. Unplug the cables and plug in again.

3. Reboot the Magic Mirror by power off the main switch of Magic Mirror, wait for 2-3 minutes, and power on again. Please make sure you switch on the PC in Magic Mirror.

6.2.4 Touch screen

What should I do if the touch screen is not accurate / over sensitive?

STEP 1: Exit all Magic Mirror modules and go back to Desktop STEP 2: Go to C:\MMSupport\ZyConfig_Tool_02.03.25_04.03.18 STEP 3: Find ZyConfig, the ZyConfig Configuration Tool STEP 4: Right click and select Run as administrator

STEP 3: Done

6.2.6 Internet Connection

What should I do if the mirror is not connected to Internet?

- 1. Check your internet router.
- 2. Contact your internet service provider if the Internet connection is not available.

6.2.7 Mirror Screen hanged.

What should I do if the mirror screen is hanged?

- 1. Switch off the main power
- 2. Wait for 5 minutes and turn on the main switch again.

7.0 System Integration

Magic Mirror is built on a truly flexible Service-Oriented Architecture (SOA) foundation. By implementing the Web Service that conforms to the published Web Services Description Language (WSDL), Magic Mirror can be easily integrated to your business environment to provide seamless customer experience and help to market your products. By applying this open framework, Magic Mirror can work with what you already have in place and improve integration with lower cost and quicker deployments.

7.1 **RFID** Integration

RFID integration functions by enabling detections of garments with RFID tags that are moving towards Magic Mirror within the distance of 50cm. This integration enhances customer experience as information detected by the RFID receiver are shown on Magic Mirror and customer is able to make modifications instantly on Magic Mirror and directly make purchase on Magic Mirror.

Note :

Please refer to **RFID Integration API Document** for more detail information on RFID Integration.

7.2 EPOS or E-Commerce Integration

EPOS or E-Commerce integration functions by enabling the direct purchasing option on Magic Mirror through an API or Web Service call. A QR code translated from transaction ID will be generated for customer as a proof of purchase that has a successful transaction on Magic Mirror.

Note:

Please refer to **Magic Mirror API Document** for more detail information on EPOS or E-Commerce Integration.

7.3 Stock Availability Integration

Stock Availability integration functions by allowing you to show all of your products on the database of Magic Mirror so that your customers can access to the stock availability of their interested products on Magic Mirror. This also enables them to know which branches to go to if the current branch is out of stock.

Note:

Please refer to **Magic Mirror API Document** for more detail information on Stock Availability Integration.

7.4 CRM Information Capture Integration

CRM Information Capture Integration is done by having both ways integration of customer data collected through Magic Mirror with your CRM system through an API or Web Service call.

Note:

Please refer to **Magic Mirror API Document** for more detail information on CRM Information Capture Integration.

8.0 Warranty

8.1 Limited Warranty

Magic Mirror warrants the original purchaser of Magic Mirror that the Magic Mirror's hardware are free from defects and conform to Magic Mirror's published product specifications when delivered to your doorstep. Magic Mirror provides a one (1) year limited warranty on all of the Magic Mirror's hardware for no charge. The warranty will start immediately on the day of purchase.

8.2 What we will do

In the event of defective hardware within the warranty period, you are required to contact Magic Mirror support service immediately. You may directly contact Magic Mirror via phone or email. The contact details are shown as follows:

- Support Hours: 9.00 a.m. To 5.00 p.m. on Monday to Friday ٠
- Telephone Support Lines : 01344988681 or 01344988650
- Email : support@magicmirror.me

Magic Mirror support service will do a problem diagnose session with you over the phone and also through remote connect support if required as you contact with Magic Mirror. The problem diagnose session is to identify the problem and may require you to reboot the equipment. If the problem is not solved over the phone and through remote connect support, Magic Mirror will make arrangement with you to collect the faulty equipment and send back to manufacturer for repair or for replacement with a new unit if it is certified as faulty. Arrangement will be done by Magic Mirror to replace the repaired or new unit in the mirror cabinet. Magic Mirror will also provide support service on the installation of the repaired or new equipment when required.

Subsequently, in the event of defective hardware after the warranty period, you may also request for help from Magic Mirror support service with additional fees charges on the replacement of the faulty parts.
